COLLEGE PROJECT

Coffenect Loaning System

This website is an Integration of Capstone Project where we add a loaning system that automatically add interest when the payment exceed the due date. We uses HTML, CSS, JS, PHP and phpMyAdmin on making this website.

Rice Inventory System

This project is made in VB where it can helps on inventory tracking process reduce manual effort and improve productivity in rice storage and distribution management. It can handle increasing volume of inventory we uses MySQL for database.

Primary EdHub

This website is designed for kids in kindergarten through grade 2, allowing them to study, view videos and take quizzes from the convenience of home. Admins can add, update and delete modules and videos from the system. We uses HTML, CSS, JS, PHP, phpMyAdmin and we also uses Bootstrap for this project.

Campus Lens: An Augmented Reality Application for UBLC

This is our Capstone Project an mobile application, it is dedicated for University of Batangas Lipa City. It is designed to enhance the university experience and it aims to provide an innovative platform that bridges physical and digital environment. We build this system in Unity using C# and our database is Vuforia
